Community Change

Youth analyze community issues—and take action.

1. IDENTITY, INTERESTS & ASSETS

Explore who we are, what matters to us, and the strengths we can bring to our community.

2. PROBLEM SELECTION

Identify community concerns and choose a problem to investigate together.

3. CAUSES OF THE PROBLEM

Research why the problem happens. Gather evidence instead of relying on assumptions.

4. EFFECTS OF THE PROBLEM

Examine how the problem affects people, places, and daily life. Listen to those affected.

5. INTERVENTIONS TO THE PROBLEM

Investigate possible solutions, existing efforts, and partners. Decide what could address the causes.

6. ACTION PROJECT

Plan and carry out an action project. Share what you learned, review results, and reflect on next steps.
